1.0 INTRODUCTION

1.1 Purpose of the Document

The purpose of this document is to provide a comprehensive overview of the *UTM Technopreneurship Showcase 2025* program, which will be held on 26th June 2025 at the Faculty of Computing, Universiti Teknologi Malaysia (UTM).

This proposal outlines the planning, structure, objectives, and expected outcomes of the program, which serves as a platform for students, startups, and researchers to exhibit their innovations to a wider audience, including industry stakeholders and potential investors. The document is intended for internal and external stakeholders, including university administrators, potential sponsors, industry partners, and committee members.

By detailing the scope, activities, and technical aspects of the showcase, this proposal aims to ensure smooth coordination among the organizing committee and effective engagement with sponsors and participants. It also supports the transparency and professionalism required for securing resources and partnerships crucial to the success of the event.

1.2 Objectives

The UTM Technopreneurship Showcase 2025 is a university-level initiative designed to cultivate a strong culture of innovation, entrepreneurship, and collaboration between academia and industry. The main objective of the program is to provide a platform where students, researchers, startups, and industry leaders can come together to exchange ideas, demonstrate technological advancements, and explore opportunities for real-world application and impact.

At its core, the program aims to nurture and highlight the entrepreneurial mindset among UTM students. Through structured activities such as pitching sessions, exhibitions, forums, and guest speaker panels, participants are encouraged to think beyond the classroom, refine their ideas, and present them to audiences that include potential investors, industry experts, and academic mentors. This not only enhances their confidence and communication skills but also exposes them to real business environments and feedback.

In addition, the program seeks to strengthen university-industry linkages by creating a space for networking, partnership building, and knowledge sharing. By involving external stakeholders such as tech companies, venture capital firms, and government agencies, the showcase encourages collaborative efforts that can lead to internships, research commercialization, or startup funding. It also positions UTM as a hub for emerging innovation and a source of future technopreneurs.

Another key objective of the event is to inspire and educate the broader university community. The inclusion of impactful guest speakers, panel discussions, and interactive exhibitions serves to expose students and attendees to current trends in technology, entrepreneurship, and sustainable business practices. It promotes lifelong learning and motivates participants to pursue their own innovation journeys.

The Showcase segment, as a central part of the program, plays a vital role in achieving these objectives. It provides selected participants with the opportunity to present their products, solutions, or business ideas through exhibition booths and live demonstrations. This not only brings visibility to student-led and research-based projects but also supports the development of critical entrepreneurial skills such as pitching, branding, and customer engagement.

Ultimately, the UTM Technopreneurship Showcase 2025 aims to create a dynamic and inclusive environment where ideas can grow, networks can form, and talents can be recognized. By aligning academic knowledge with real-world innovation challenges, the program aspires to contribute meaningfully to the growth of Malaysia's technopreneurial landscape and empower the next generation of changemakers.

1.3 List Of Activities

Opening Ceremony

The opening ceremony will mark the official launch of the UTM Technopreneurship Showcase 2025. It will feature welcoming remarks from guests of honor, followed by speeches from UTM leadership and invited representatives of participating companies. This segment sets the tone for the event, outlines the objectives of the program, and acknowledges the efforts of all committee members involved.

Startup and Innovation Exhibition

This exhibition will serve as a core element of the showcase, where students, researchers, and startups display their projects, prototypes, and technological innovations. Each team or company will be allocated a booth to present their work to attendees, including industry professionals, academics, and the public. Companies such as Imagine AI, RunCloud, Infinite Loop Media, Xantec, and Mar slab Solution will also take part, showcasing real-world solutions that align with the theme of innovation and entrepreneurship.

Guest Speaker Series

A lineup of impactful talks by the invited company's representatives will take place throughout the day. Speakers from Imagine AI and Infinite Loop Media, among others, will share their personal journeys, entrepreneurial lessons, and insights into future trends. This session is designed to motivate students and broaden their understanding of what it takes to thrive in the innovation-driven economy.

Industry Networking and Partnership Zone

This informal interaction space will allow students, faculty, and industry guests to connect, exchange ideas, and explore potential collaborations. Activities may include speed networking, startup-investor matching, and internship scouting. The objective is to improve university-industry relations and create opportunities for future collaborations, job opportunities, or research commercialization.

Skill and Innovation Workshops

Skill and innovation workshops will help participants develop practical skills and creative thinking related to entrepreneurship and technology. Topics may include idea generation, basic startup planning, branding, and using digital tools. The sessions will be hands-on and guided by experienced speakers from the industry and university. The goal is to give students useful knowledge they can apply to their projects or future careers.

Closing Ceremony

The closing ceremony will mark the end of the showcase with final speeches from UTM representatives and industry partners. It will highlight the key moments of the event and thank all participants, speakers, and supporters for their contributions. Tokens of appreciation will be given to guest speakers and partners. The session will also encourage everyone to stay connected and continue exploring opportunities in innovation and entrepreneurship.

1.4 Targeted Audience and Potential Participants

The UTM Technopreneurship Showcase 2025 is designed to be a dynamic and inclusive event that welcomes a diverse range of participants from both within and beyond the university. The program specifically targets students, academics, professionals, and the wider public who are engaged in or supportive of innovation, entrepreneurship, and technological advancement.

Among the primary audiences are UTM students and alumni, particularly those involved in technopreneurship projects, final-year innovation-based assignments, startup ventures, or technology competitions. These individuals are encouraged to participate as exhibitors,

presenters, or attendees, offering them a platform to showcase their ideas, gain exposure, and build professional networks. Alumni with established ventures may also be invited to participate, serve as mentors, or share their experiences as guest speakers.

The program also seeks to engage startup founders and entrepreneurs, especially those in the early or growth stages of their businesses. These participants may have direct or indirect links to UTM, and their involvement helps to bridge academic innovation with real-world application. Their presence adds valuable perspectives to the event and encourages collaboration with students and researchers.

Academicians and researchers from various faculties within UTM also represent a key target group. Their participation in showcasing applied research, prototypes, or collaborative projects strengthens the university's role as a hub of innovation and knowledge transfer. It also opens doors for interdisciplinary work and potential commercialization of academic research.

Equally important are industry representatives, including professionals, executives, and investors from technology firms, venture capital organizations, business incubators, and innovation ecosystems. Their participation provides students and researchers with access to mentorship, funding opportunities, and practical insights into market needs and industry standards. The event is an excellent avenue for companies to scout talent, form partnerships, and stay updated on emerging innovations.

Government agencies and non-governmental organizations (NGOs) are also targeted as essential participants, particularly those focused on youth development, entrepreneurship, digital economy, and innovation policy. Their involvement not only adds credibility to the program but also strengthens the link between public initiatives and academic or grassroots innovation.

Lastly, the general public, media representatives, and members of educational institutions are encouraged to attend the event. Their engagement helps promote awareness of the technological and entrepreneurial efforts taking place at UTM and inspires broader community interest and support for local innovation.

To help in visualizing the participants expected from this program, the table below shows the breakdown of estimated participants.

Participants	Estimated Number of Participant
SECD3761 Students	111
UTM Students	60

UTM Alumni	10
UTM Academicians & Researchers	15
Startup Founders & Entrepreneurs	25
Industry Representatives	35
Government & NGO Representative	15
General Public	40
Total Estimated Participants	311

1.5 Technical Aspects of The Programme

The *UTM Technopreneurship Showcase 2025* program, which will be held on 26th June 2025 at the Faculty of Computing, Universiti Teknologi Malaysia (UTM). Hence, to ensure the can be executed smoothly without any issues that may or could occur, there are a few technical components involved. The aspects can be addressed into:

1. Event setup and infrastructure

For starters, the specific location for the programme can be held at N28A, Faculty of Computing, UTM. The location is perfect as it consists of a hall (Dewan Kejora) for pitching sessions for a showcase and guest speaker forums. Besides, the building also has open zones which are suitable for small exhibitions and networking areas between the students of the faculty and the invited guest. Not to mention that the Internet access will be made available for easy access to everyone for a seamless online collaboration. Seating was arranged to comfortably accommodate participants while maintaining space for networking and movement throughout the venue.

As for the setup, each exhibitor will be equipped with tables, chairs and power supply and basic signage for them to showcase their product at their very own booth. As for the pitching sessions, Dewan Kejora are required to be set up with essential audio-visual tools such as projectors, wireless microphones, speaker systems, and display screens—ensuring all sessions were both clear and engaging for the audience. All equipment, including AV systems and connectivity setups, will undergo thorough testing the day before the event. This proactive approach helped minimize the risk of technical disruptions and allowed for a smoother seminar experience.

2. Presentation and display technologies

For presentation sessions, speakers are required to create their materials using **Canva**, a user-friendly design platform well-suited for crafting visually engaging content. However, speakers are also allowed to use any other digital media platform. Live demonstrations were supported by high-performance laptops and any specialized hardware required, allowing speakers to showcase AI tools and applications effectively. The projectors, display screens, and sound systems will be set up for pitch stages and keynote sessions. As mentioned before, organizers will also provide technical support staff to assist with any setup issues during the event. Beside that, backup copies of all presentations and spare devices were prepared in advance to mitigate any unforeseen technical issues.

For an interaction between speakers and audience, wireless microphones will be given to the audiences for the Q&A sessions, making it easy for participants to communicate directly with speakers. In addition, strategic break times and designated spaces allowed attendees to network, share contacts, and discuss collaboration opportunities in a relaxed setting.

3. Media and documentation

To ensure the programme reaches its target audiences, the multimedia team will take charge for creating pre-event posters and capturing all the key moments — including opening and closing ceremonies, pitching sessions, exhibition walkthroughs, and interactions between participants and guests. The material can be used for post-event reports and an archival record of the event's highlights. Digital brochures and infographics were also developed to provide attendees and external guests with essential information about the programme schedule, featured speakers, and booth layouts. These materials were distributed both before and during the event to improve engagement and navigation. Live Streaming options may also be considered for broader audience reach, especially for panel discussions and keynote addresses.

In summary, the technical aspects of the UTM Technopreneurship Showcase 2025 are designed to support a professional, seamless, and future-ready event experience for all stakeholders. A proper planning, deployment of technology, and real-time technical support will ensure that the showcase not only runs efficiently but also delivers high value to its participants and audience.

2.0 INVITED COMPANY BACKGROUND

To ensure the success of this programme, several prominent companies and startups have been invited to participate. These organisations represent a diverse mix of industries and are actively engaged in innovation, technology development, and entrepreneurship where their involvement is ideal for knowledge sharing and collaboration. A brief overview of each invited company is provided as following below:

1. Imagine AI Sdn. Bhd.

Imagine AI is a Johor-based technology company specializing in artificial intelligence solutions for various sectors including education, security, and enterprise automation. Their focus is on delivering intelligent, scalable systems that enhance efficiency and decision-making. With a strong emphasis on innovation and applied research, Imagine AI frequently collaborates with academic institutions and government agencies to bring AI-driven technology to market.

2. Infinite Loop Media Sdn. Bhd.

Infinite Loop Media Sdn. Bhd. (ILM Group) is a creative technology firm that merges media, storytelling, and cutting-edge technology to deliver immersive experiences. They are known for their work in video production, digital advertising, branding, and augmented reality (AR). As a digital innovation partner, the company contributes significantly to enhancing marketing efficiency and customer engagement through data-driven insights and solutions. ILM Group's expertise is a valuable addition to the Showcase, particularly in guiding participants on how to package and pitch their innovations.

3. RunCloud Sdn. Bhd

RunCloud Sdn. Bhd. is a well-known Malaysian cloud management platform that simplifies server management for developers and businesses. Focused on DevOps and automation, RunCloud enables users to deploy, configure, and monitor servers and web applications with ease. Their platform supports secure and optimized performance for cloud-based solutions, making them an essential player in the Malaysian and Southeast Asian tech ecosystem.

4. XANTEC Solutions Sdn. Bhd.

XANTEC Solutions is a technology consultancy and software development company offering a range of services including custom web applications, enterprise software, and IT infrastructure solutions. With a strong footprint in Johor Bahru, XANTEC is committed to helping businesses modernize their operations through tailored digital solutions. The company is known for its collaborative approach and close engagement with clients to deliver high-impact outcomes.

5. Marslab Solution

Marslab Solutions Sdn. Bhd. is a digital innovation company focused on web systems, mobile application development, and UI/UX design. They focus on creating impactful

user experiences through design-thinking and agile development practices. Marslab collaborates with startups, enterprises, and government agencies to develop functional and scalable digital products.

3.0 IMPACT OF THE PROGRAMME

This event is expected to create a meaningful impact on all parties involved. This section outlines the key impacts of the programme on both the organizer and participants.

3.1 Impact to The Organizer

This showcase event offers many benefits to the organizing team, especially leadership, professional development and institutional visibility. As a team that is responsible for planning and executing the showcase, the organizers will gain valuable experience in the event management.

Firstly, the event provided a great opportunity to improve teamwork and communication skills. Effective coordination with departments, external vendors, startups and stakeholders helps the organizer strengthen the interactive communication, negotiation and decision-making abilities. These are the essential skills in today's professional environment and it can contribute to long term career development.

In addition, the event also can raise the reputation of both organizers and UTM as a whole. A successful technopreneurship showcase shows the ability to conduct high-quality, impactful events, sponsors and the academic community. This can increase the chance of future collaborations, sponsorships and support for similar initiatives with the industries.

Lastly, organizing the technopreneurship showcase gives hands-on experience in event planning like scheduling, promotion, technical setup and stakeholder coordination. They will gain ability and sharpen their skills in problem solving, public speaking, handling issues and adapting with an under pressure environment. This will prepare organizers for the many challenges and builds confidence to lead in any complex projects in the future.

In summary, the technopreneurship showcase serves as a platform for the organizing team to grow personally and professionally, while also enhancing the visibility and impact of UTM as a leader in promoting technopreneur talent. The organizers also have improved their ability to manage the demands of a dynamic workplace by honing these skills, which will help them be well-prepared for their future careers.

3.2 Impact to The Participants

The Technopreneurship Showcase is designed to deliver meaningful and lasting value to all participants including UTM Students, startups and the researchers will gain several meaningful benefits. This will explain the impact of this event to participants.

Exposure and Visibility:

This showcase gives opportunities to participants to present their innovations to a wide audience that includes industry, potential investors and fellow technopreneurs. This exposure not only highlights their creativity and technical skills but also increases their ability as future technopreneurs. Being seen at a recognized university event can open the doors to future opportunities such as speaking engagements, project invitations or media attention.

Constructive Feedback:

Participants are allowed to receive direct feedback from the professionals, judges and potential users. All of the input is important in helping them to refine their products or solutions and also identifying areas for improvement to be better. Engaging in such feedback sessions will help participants to build flexibility, improve their communication and presentation skills and also develop a clearer understanding of market expectations.

Opportunities for Collaboration:

Networking is the most important key in the technopreneurship showcase. Participants will connect with like-minded people, industry experts, university researchers or even the startup peers. These interactions can help them to lead the future partnerships, research collaborations or the formation of the startup teams. By creating these networks early, participants can gain access to diverse knowledge, skills and resources that can support their long-term innovation journey beyond the events successfully. Additionally, connections also can spark new ideas, encourage teamwork and open to future market opportunities.

4.0 TENTATIVE PROGRAMME

Time	Activity	Description
8.00 AM - 9.00 AM	Registration and Booth Setup	Arrival of participants, registration, and preparation of exhibition booth
9.00 AM - 9.30 AM	Opening Ceremony	Welcome speech by UTM officials and invited guests to officially start the event.
9.30 AM - 12.30 PM	Startup & Innovation Exhibition (Session 1)	Project and company booth open to visitors, students, and industry guests.
10.00 AM - 11.30 AM	Skill & Innovation Workshops (Slot 1)	Hands-on session on idea development, startup planning, branding, or tech tools.
11.30 AM - 12.30 PM	Guest Speaker Series (Part 1)	Innovative talk by a technopreneur, or industry expert.
12.30 PM - 2.00 PM	Lunch Break & Industry Networking	Free time for lunch and informal networking around the booth.
2.00 PM - 3.30 PM	Startup & Innovation Exhibition (Session 2)	Continuation of booth visits and interaction with guests and partners.
2.30 PM - 3.30 PM	Guest Speaker Series (Part 2) or Panel Talk	Inspiring talk by UTM alumnus.
3.30 PM - 4.00 PM	Closing Ceremony	Final speeches, appreciation for guests and partners, and group photo sessions.

5.0 ORGANIZING COMMITTEE

6.0 PROPOSED BUDGET (MYR)

To ensure the smooth execution of this programme, a detailed budget has been planned to cover all essential aspects of the programme. The detailed budget for the event can be seen as follows:

Expenses	Total
Venue: Rental of N28A Kejora Hall	RM500
Booth Setup	RM200
Speakers: 1. Dr. Chi Wee Tan 2. Mr. Ken Neoh # Each speakers RM150	RM300
Audio-Visual Equipment: Microphones, Speakers, Projectors	RM200
Refreshments for speakers: Morning and Afternoon Tea	RM250
Materials and Supplies: 1. Printing (Programs, Registration) 2. Banner 3. Tables and chair for booth	RM200
Marketing and Promotion: Online Advertising and Poster	RM100
Contingency Fund: Miscellaneous Expenses	RM50
Total	RM1800

7.0 CONCLUSION

This programme is not just an exhibition for companies to showcase their product to participants, but it also can be a valuable experience for attendees to gain insight into the industry. Besides, it can also be the key for them to create more innovation, collaboration and grow within and beyond the reach of university. By bringing this programme together, aspiring attendees get to explore their entrepreneurial ideas, interact with industry players to build the networking, and gain exposure to the startup ecosystem, which is also a great way to connect with others who share the same passion for innovation and technology.

Through this programme, a perfect environment and carefully planned activities as this programme consists of activities that will inspire more students as it consists of startup pitching, product demonstrations, and interactive exhibitions, the showcase is set to provide immersive experiences that bridge the gap between academic knowledge and industry practice. We believe it will attract more students to turn their ideas into action. At the same time, it helps to highlight UTM as a university that supports and promotes technopreneurship. Overall, this showcase has the potential to make a lasting impact on participants, visitors, and the wider community.
