1. Introduction

Need (N)	The existing manual system at Koperasi KADA poses several challenges, including inefficiencies in processing membership and loan applications, inaccuracies in record-keeping, and difficulties for members to access financial information. These issues lead to time delays, increased administrative workload, and reduced member satisfaction. A digital solution is necessary to address these problems, ensuring that processes are more streamlined, accurate, and accessible to all stakeholders.
Approach (A)	The proposed system will be a web-based platform designed specifically for Koperasi KADA's operations. It will feature online membership and loan applications, automated transaction tracking, and real-time status updates. The system will generate monthly and yearly invoices automatically and provide members with easy access to their transaction histories and outstanding loans. The solution will integrate seamlessly with the cooperative's existing workflows, ensuring the ALK meeting approval process for loans is preserved while digitizing records and notifications.
Benefit (B)	By implementing this digital system, Koperasi KADA will achieve significant operational efficiency and improve service quality. Members will experience enhanced convenience through self-service access to financial records and application statuses, while administrators will save time and effort with automated processes and reporting. This will foster greater transparency, accountability, and satisfaction among all users, ultimately supporting the cooperative's growth and modernization.
Competitor (C)	While similar cooperative management systems exist, many are generic and lack customization for Koperasi KADA's unique requirements, such as the ALK approval process. The proposed system differentiates itself by being tailored specifically to the cooperative's operational model, offering an intuitive interface and features that directly address its pain points. For example, unlike off-the-shelf solutions, this system will allow integration with KADA's existing workflows while maintaining its member-centric focus.

Table 1: NABC of KADA Corporation System

2. Existing Systems

The current Lembaga Koperasi KADA majorly works manually in case of public services such as member registration and loan application. This company does have a system, but it is not available to the public and only accessible for the staff by using the company computers. However, we grasp how things are done by the company which will be explained in this section.

Firstly, we learned that all the data is only accessible to the staff of KADA Koperasi, this means that the members and applicator cannot check their details directly. They have to contact the office to be able to get information about their membership and loan details if any. We also found that this cooperation services are only open for the members of KADA that registered as Koperasi members. This means that the corporation involved only a small circle of people.

Next, Koperasi KADA provides registration for membership and loans for their members. The system that is currently used by this cooperation is manual registration and application using physical form. The members who wish to apply for Koperasi membership and loan have to take the physical application forms from the office and fill in manually before sending them back to the office. For those who applied for a loan, if it is their first time applying, they need to pay a share fee which is RM300. Below are all the forms used by KADA to get their customers information for various services offered.

The form is titled "PERMOHONAN MENJADI ANGGOTA" (Membership Application Form) for Koperasi KADA. It includes the following sections:

- Personal Details:** NAMA (Name), NO. KP (KPP Number), TARAF PERSEORANGAN (Personal Status), ALAMAT (Address), NO. ANGGOTA (Member Number), NO. P (KPP Number), ALAMAT PEKERJA (Worker Address), (Tempat Bertugas) (Place of Work), NO. TELUKAN (Telephone Number), NO. TEL. KEMER (Mobile Number), NO. TEL. RUMAH (Home Number), and KEMER (Mobile Number).
- Registration Fee:** A section for the registration fee, with a handwritten amount of RM 300.
- Member Information:** A table with columns for NO. ANGGOTA (Member Number), NAMA (Name), and NO. K/P @ NO. SPT (KPP Number / SPT Number).
- Member Details:** A section for the member's details, including a list of fees and a table for the member's details.
- Member Details Table:** A table with columns for NO. ANGGOTA (Member Number), NAMA (Name), and NO. K/P @ NO. SPT (KPP Number / SPT Number).

[illegible]

Then, the clerk will manually upload customers' details in the KADA system that is only accessible to them before all the forms are reviewed in the monthly meeting. The ALK (Ahli Lembaga Koperasi) is in charge of validating all the application forms that are sent in the current month in their monthly meeting. In this meeting, they will validate one by one of all the applications for the month.

From the meeting done with KADA, we also gain information about the share fees, RM55 that Kooperasi members have to pay every month. The minimum share fees that members can pay for is RM35. If the member has an unpaid loan, this will include the loan monthly payment. These fees will be paid each month automatically by salary cut. Transaction invoice will be generated in a certain duration. Below is an example of the transaction invoice produced by the current system in KADA.

Figure 4: The current transaction invoice

The main problem of the current system available is that it is not available to the public, making it hard for the KADA members to get their details on transactions made or loan balance without needing to go to their office. It will be much easier if there is a system made so that all the members, staff and even ALK can reach the data they need remotely and fast without having to go back and forth to the office.

We think that the proposed system is definitely better for the company to strive and makes the job easier for all the people involved. This is because, with the new system, customers do not need to get the application forms from the office anymore. They can access it through this system and fill it up online easily and send it right away for further inquiries. This method saves staff workloads as well since they no longer have to insert the customers and members information manually to the computers and have more organized and clean data. With the proposed system, approval processes such as member and loan approval will be much easier too. Staff members do not need to call each approved applicator about it. The

system itself will help notify members after their application is approved through email or notification. This will save time and avoid confusion too. To prove our point clearer, below is the comparison between the current system and proposed system regarding the system features.

Features	Current System	Proposed System
Online form for member registration	Not available	Available
Online form for loan application	Not available	Available
Check loan balance	Not available	Available
Check current share	Not available	Available
Check application approval	Not available	Available

Table 2: Comparison of existing systems and proposed system

3. Proposed System

The proposed system is an initiative to easen the registration process for membership and loan application for users and also to reduce the workload of the staff. We've created a prototype using Figma to show KADA how the proposed system will look like and how users can access the system. The sample interfaces are attached below with detailed description.

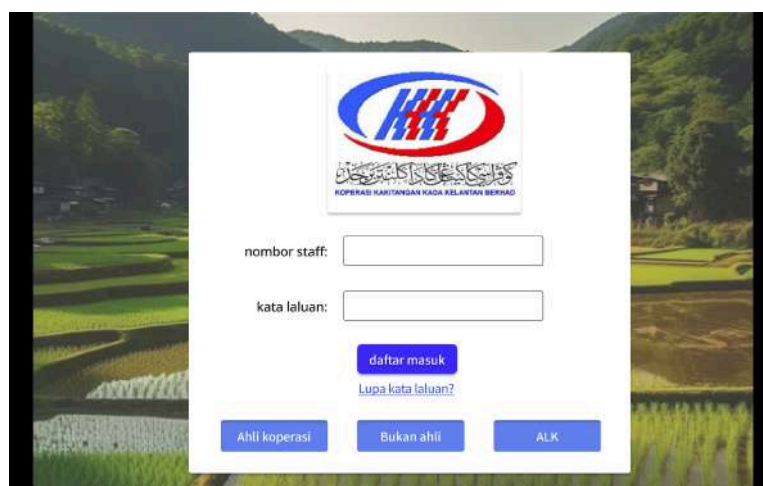

Figure 5: Login page of proposed system

Figure 5 shows the login page that appears when users click on the proposed system. The system offers options for new users, existing members, staff and Ahli Lembaga Koperasi

(ALK). Users can click on the particular field that is relevant to them and login into the system by entering their user ID and password.

Figure 6: Password renewal page

Figure 6 shows the password renewal page that appears when users click on 'Lupa kata laluan?' button. Users can key in their user ID and enter their new password to renew their password. Once the users submit by clicking on the 'Daftar Kata Laluan' button, the page diverts back to the login page as in Figure 6.

Figure 7: Homepage for non-members of Koperasi Kada

Figure 7 shows the homepage for non-members of Koperasi Kada whereby they can register to be a member and check their membership application system. A navigation bar is also displayed which shows the name and ID of the staff and shows an option of 'LogOut' if the users want to log out of the system.

Figure 11: Interface for loan application for members of Koperasi KADA

If the member clicks on 'Mohon Pinjaman' option which is to apply for a loan, Figure 11 will be the next interface, whereby the system displays the form for loan application. Members are required to key in the loan type and details and their personal information. Then, members are required to upload verification documents. Once the members are done filling up the form, they have to click on the 'Hantar Permohonan' button to submit the form. Once the form is submitted, an interface of 'Permohonan Berjaya' will be displayed to show the successful form submission.

Figure 12: Interface for loan application status

Figure 12 shows the interface that appears when members click on the 'Semak Kelulusan Pinjaman' button which is to check the loan application status. A message of 'Permohonan Anda Berjaya!' alongside the member and bank details will be displayed if the loan application is approved.

Bulan	Wang Masuk	No. Rujukan
Mei 2024	RM 55.00	P12024051856
April 2024	RM 55.00	P12024042556
Mac 2024	RM 55.00	P12024031256
Februari 2024	RM 55.00	P12024021556
Januari 2024	RM 55.00	P12024011956
Disember 2023	RM 55.00	P12023122056
November 2023	RM 55.00	P12023111756

Figure 13: Interface for Savings

Figure 13 will be displayed when members click on the 'Semak Simpanan' button which is to check their savings quantity. The total amount of savings will be displayed in green. In Figure 13, RM 12,500.00 is the member's savings. The interface also displays the amount monthly deducted from the member's salary to be added into the savings account. In this example, a total of RM 55.00 is deducted monthly.

Figure 14: Interface for Loan Balance

If the member clicks on 'Semak Pinjaman' option which is to check the loan balance, Figure 14 will be the next interface. The loan balance will be displayed in red. In this example, a balance of RM 50 is to be paid. The interface also displays the previous payment made by the member for each month together with the amount paid, reference number for the receipt and payment method. If the member clicks on 'No. Rujukan' which is the reference number for the receipt, the official payment receipt will be displayed with the loan balance, amount paid for the month, payment method and current loan balance.

The image shows a screenshot of the 'Penyata Kewangan' (Financial Statement) interface. It features a table with three columns: 'Bulan' (Month), 'Bayaran' (Payment), and 'Sejarah pembayaran' (Payment History). The table lists payments from November 2023 to June 2024, each for RM 900.00, with a hyperlink to the payment receipt for each month.

Bulan	Bayaran	Sejarah pembayaran
Jun 2024	RM 900.00	slip_pembayaran_jun2024
Mei 2024	RM 900.00	slip_pembayaran_mai2024
April 2024	RM 900.00	slip_pembayaran_april2024
Mac 2024	RM 900.00	slip_pembayaran_mac2024
Februari 2024	RM 900.00	slip_pembayaran_feb2024
Januari 2024	RM 900.00	slip_pembayaran_jan2024
Disember 2023	RM 900.00	slip_pembayaran_dis2023
November 2023	RM 900.00	slip_pembayaran_nov2023

Figure 15: Interface for Loan Statement

If the member clicks on 'Semak Penyata' option which is to check the loan statement, Figure 15 will be the next interface. Figure 15 displays the amount paid for the certain month and has the receipt hyperlinked at 'Sejarah Pembayaran' which means payment history. Members can also download their loan statement by clicking on 'Muat turun penyata kewangan' button which translates to download loan statement.

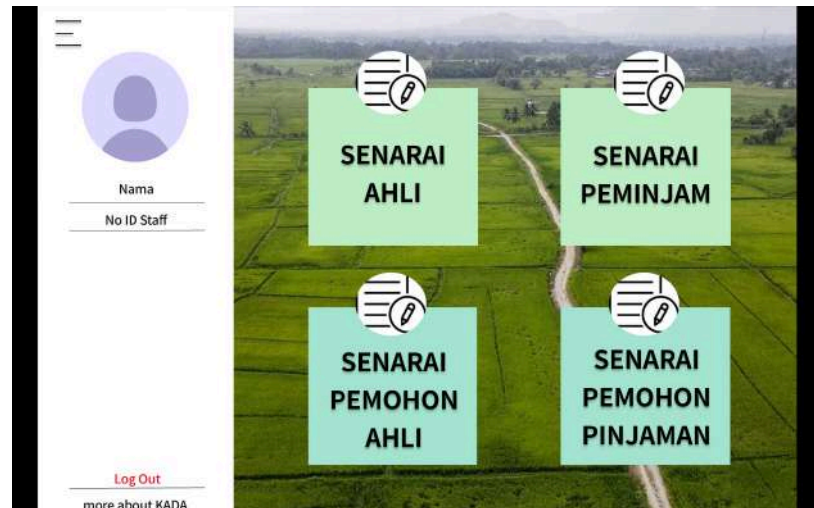

Figure 16: Homepage for staff of Koperasi KADA

Figure 16 shows the homepage for staff where staff can choose to check members' list, members with loan list, list of users who applied for membership and list of members applied for loan.

Figure 17: Interface for members' list

Figure 17 shows the list of members of Koperasi KADA when the 'Senarai Ahli' button is clicked. Staff can download the list of members by clicking on the 'Muat turun senarai ahli' button. Once the download is successful, a message of 'Berjaya dimuat turun' will be displayed.

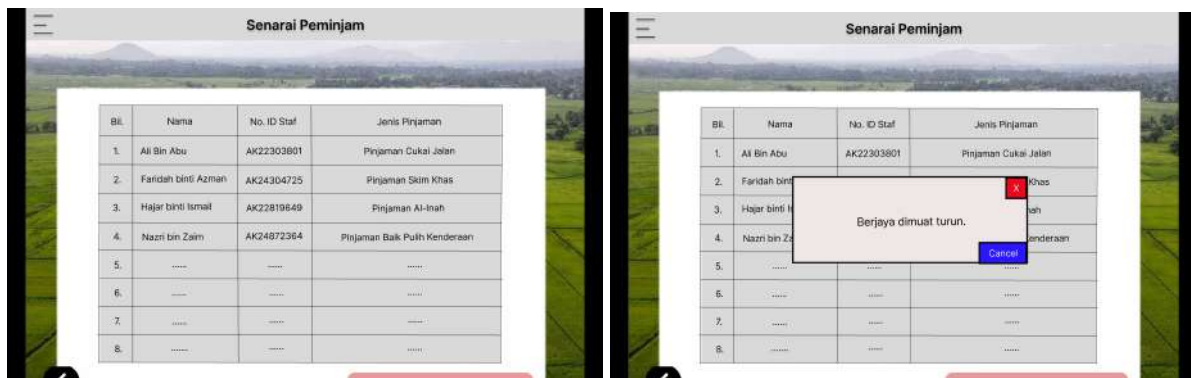

Figure 18: Interface for members with loan list

Figure 18 shows the list of members of Koperasi KADA with loans when the 'Senarai Peminjam' button is clicked. Staff can download the list of members by clicking on the 'Muat turun senarai peminjam' button. Once the download is successful, a message of 'Berjaya dimuat turun' will be displayed.

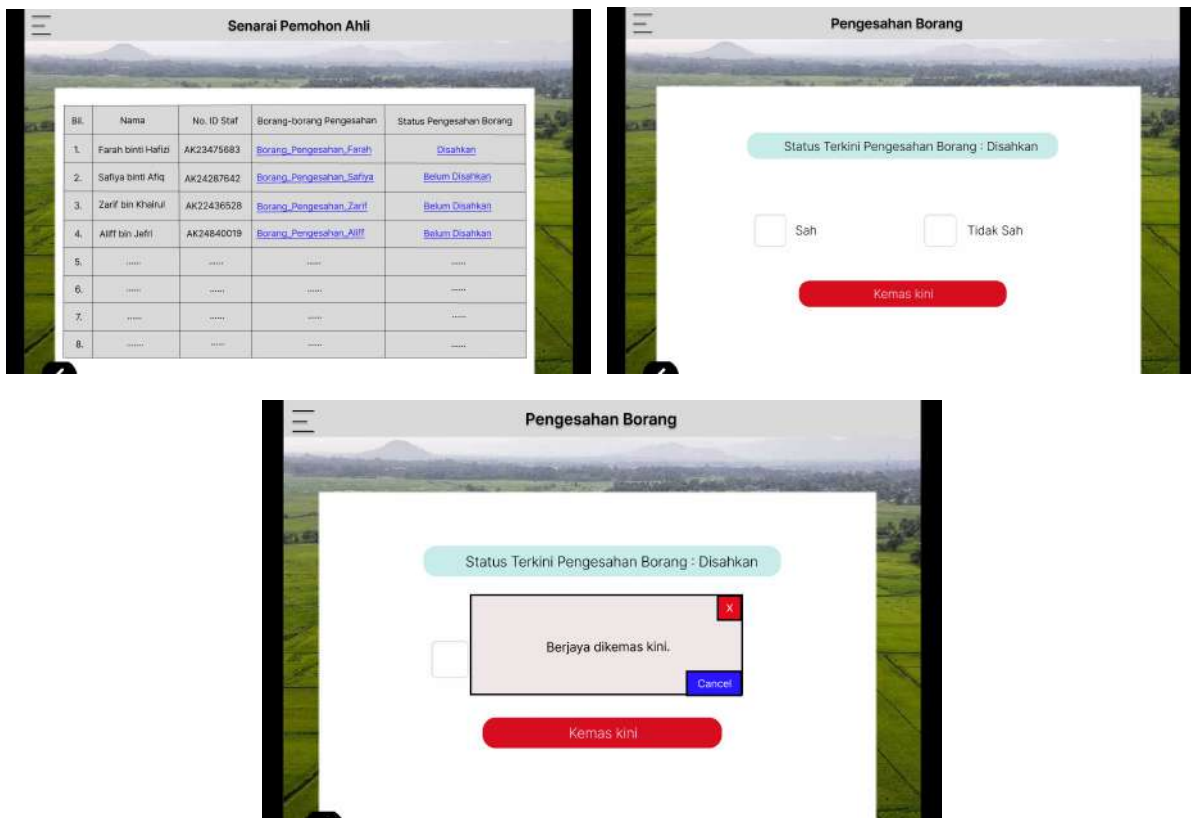

Figure 19: Interface for list of users who applied for membership

Figure 19 shows the list of users applied for membership with their name, ID number, verification documents and verification documents approval status. To validate the documents, staff have to click on the status of the verification documents approval for each applicant. An interface with the current status of the approval will be displayed. Staff can

either choose to validate or not validate the documents after checking them. Staff have to click on 'Kemas kini' button to update the documentation validity. Once the status is updated, a message of 'Berjaya dikemas kini' will be displayed.

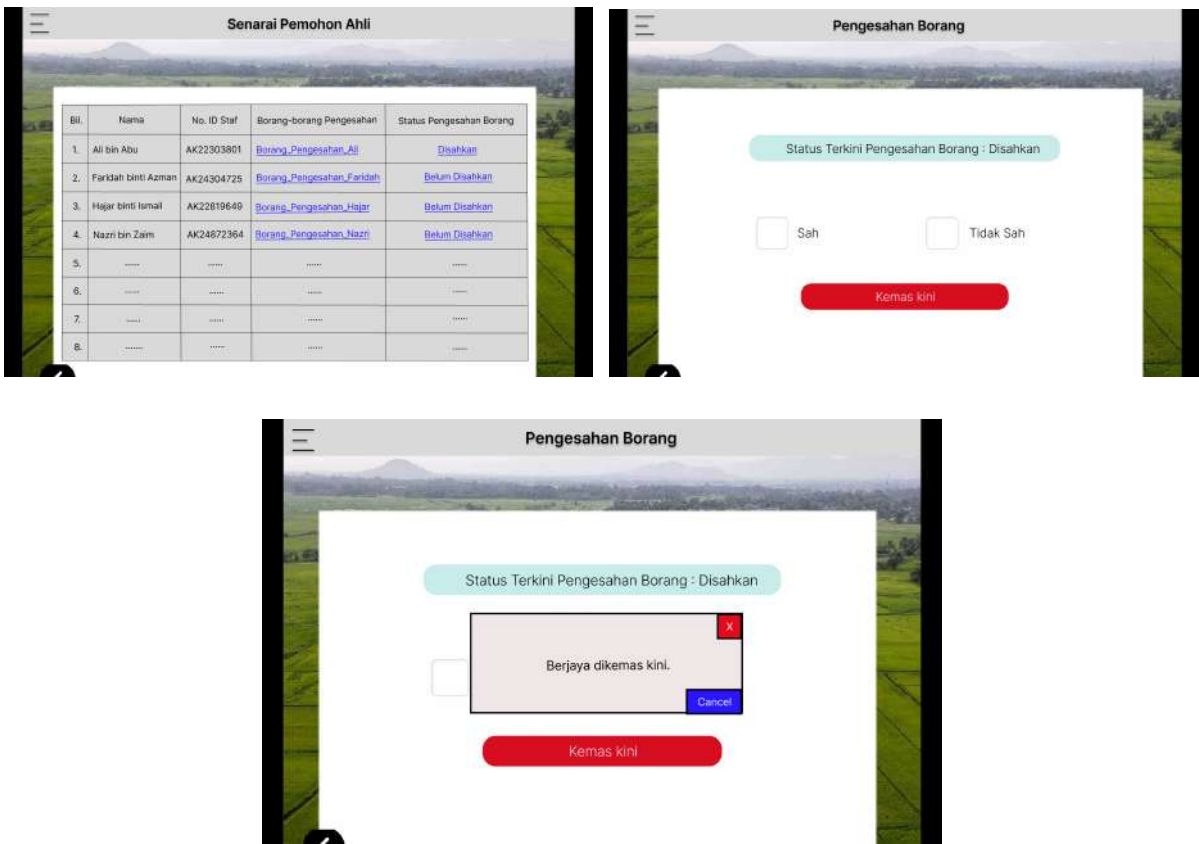

Figure 20: Interface for list of members who applied for loan

Figure 20 shows the list of members applied for loan with their name, ID number, verification documents and verification documents approval status. To validate the documents, staff have to click on the status of the verification documents approval for each applicant. An interface with the current status of approval will be displayed. Staff can either choose to validate or not validate the documents after checking them. Staff have to click on 'Kemas kini' button to update the documentation validity. Once the status is updated, a message of 'Berjaya dikemas kini' will be displayed.

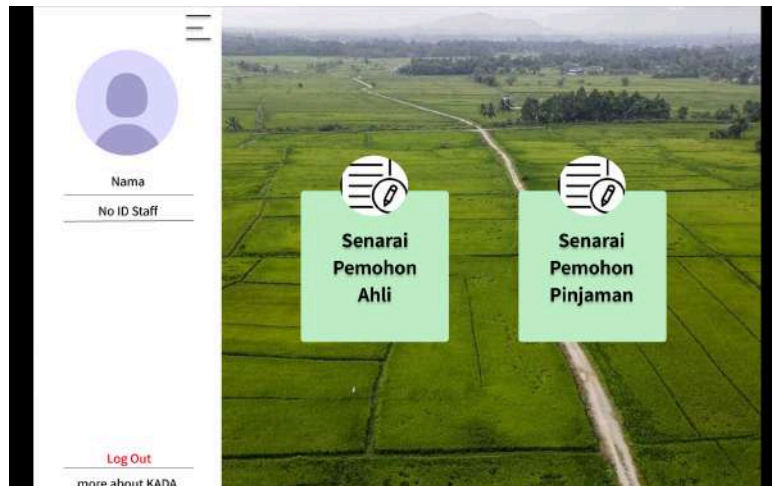

Figure 21: Homepage for ALK of Koperasi KADA

Figure 21 shows the homepage for ALK where ALK can choose to check membership application list and loan application list.

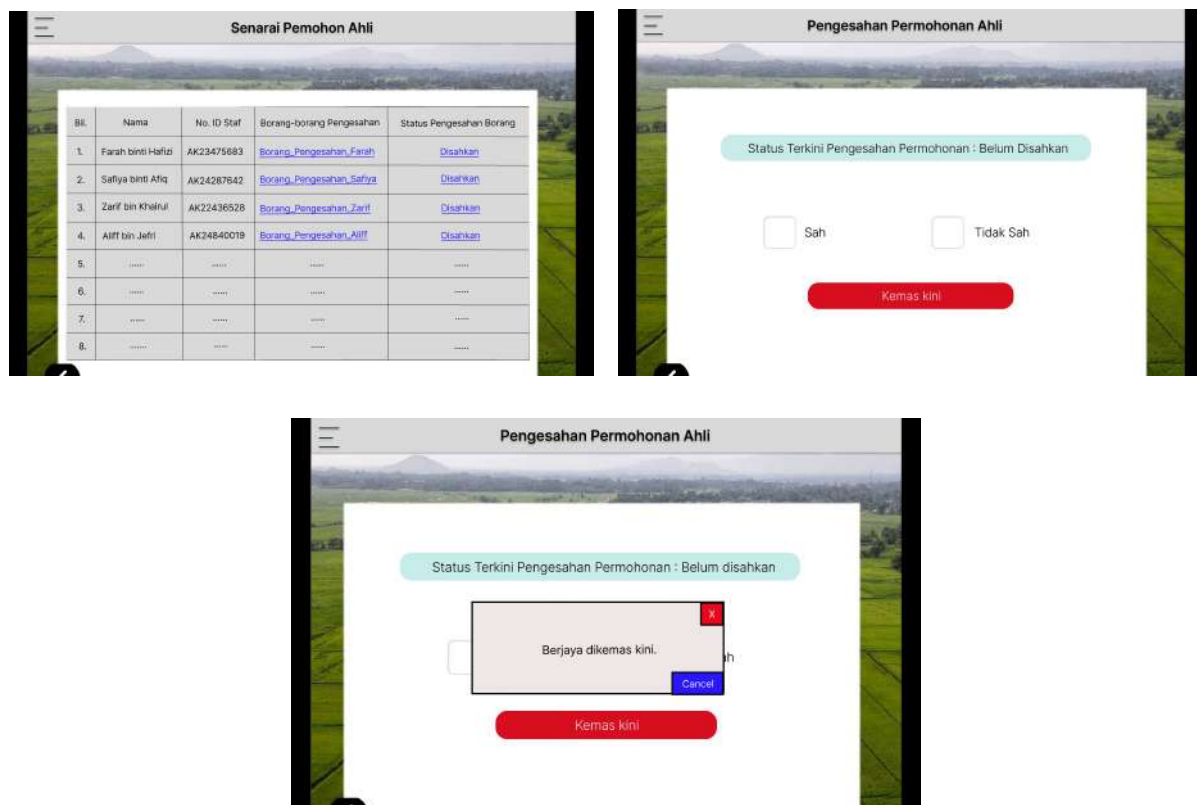

Figure 22: Interface for membership application list

Figure 22 shows the list of applicants who applied for Koperasi KADA membership. ALK can view the list of applicants with valid verification documents. Therefore, ALK can cross check the documents and validate the application if the application fits the requirements.

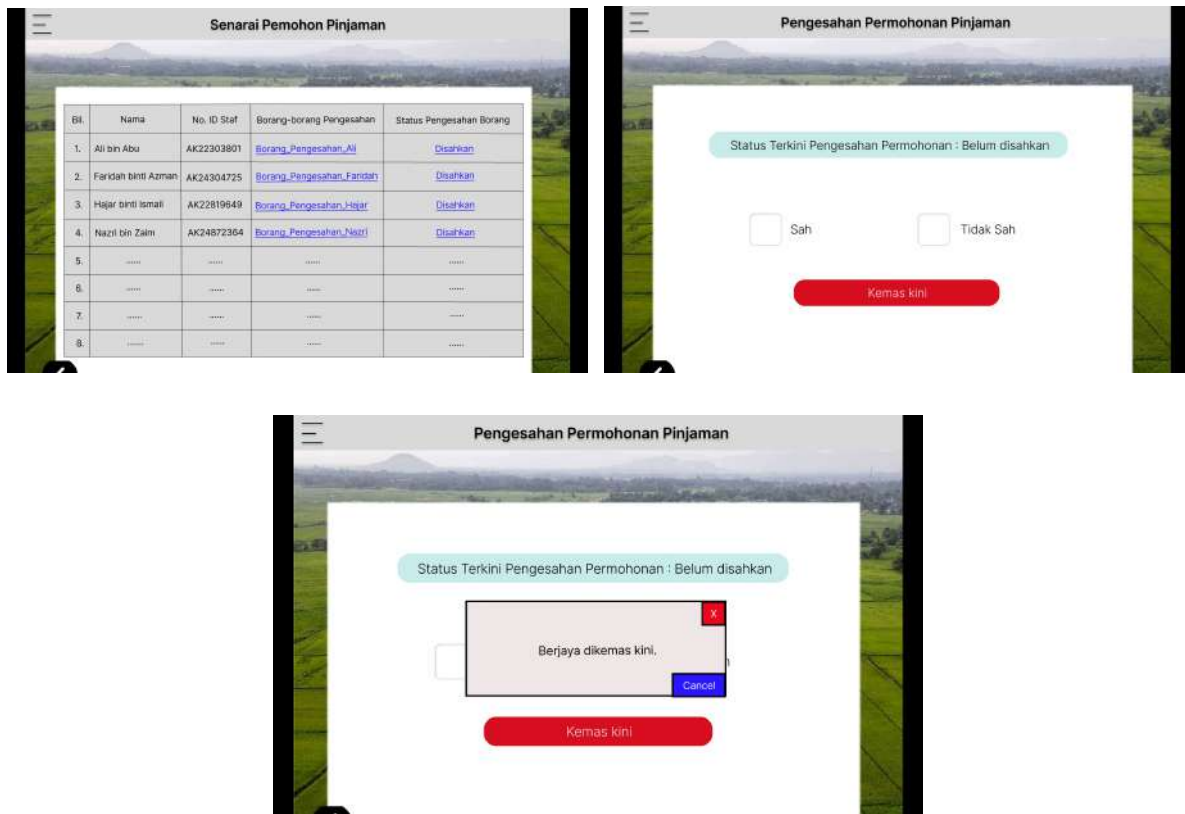

Figure 23: Interface for loan application list

Figure 23 shows the list of members who applied for the Koperasi KADA loan. ALK can view the list of members with valid verification documents. Therefore, ALK can cross check the documents and validate the application if the application fits the requirements.

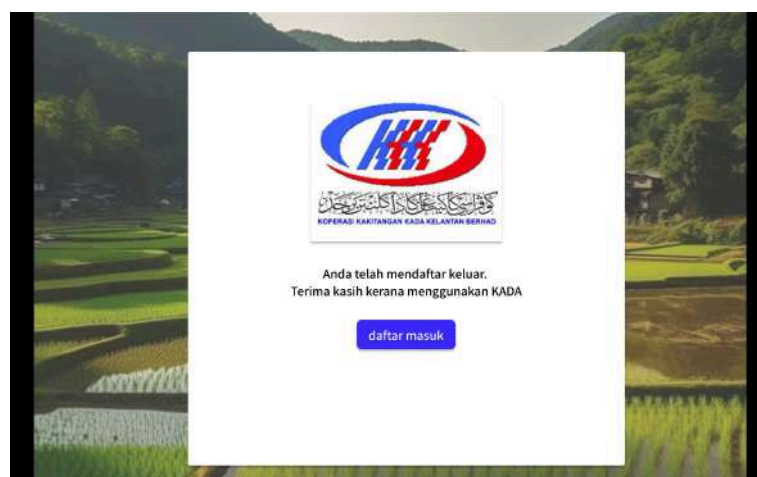

Figure 24: Interface for logout page

When users click on the 'Log Out' option on the navigation bar, Figure 24 will be displayed as the logout page. The system confirms the user logout session by displaying relevant

messages and provides an option to log in back into the system by clicking on 'Daftar masuk' button.

Overall, the proposed system comes in handy for the users to not only apply for membership and loan, but also to check loan balance and loan statements. Not only that, Koperasi KADA staff do not have to manually key in the details of the users one-by-one if the proposed system is implemented. The proposed system also enables users to use the system out of office hours, therefore, there is no time constraint for the users.

4. Software Process Model

4.1 Justification on choice

System Software Development Life Cycle (SDLC) is one of the systemic frameworks in developing a system where it consists of 5 different phases in completing a system. The phase consists of Planning, Analysis, Design, Implementation and Testing where each phase needs to be completed before proceeding to next phases. Hence, SDLC is chosen after each phase will be evaluated before proceeding to the next phase. Due to this system technique that is approached by review and evaluated for every phase before moving to the next stage, it also will reduce the risks that might occur in the future which might cause damage to an organisation. This can ensure the system can be executed without any problem. This systematic technique as the system is.

4.2 Detailed activities

Table 3 below shows the detailed activities covering Software Development Life Cycle (SDLC) which consists of Planning, Analysis, Design, Implementation and Testing. Throughout every phase,

Phase	Detail Activities	Description
Planning	Meeting with industry	Project briefing with the industry via online meeting
	Project Planning	Team leader divide the task with team member
Analysis and Design	Information gathering process	Gather requirement with industry via WhatsApp group with industry

	Design UML with description	• Design use case diagram • Design class diagram • Design activity diagram • Design sequence diagram
	Create System Requirements Specification (SRS)	• Discuss SRS planning • SRS documentation
	Create SDD	Software Design Document (SDD) documentation
	Design system architecture	• Design presentation layer • Design application layer
Implementation	System construction (coding)	Developing all parts of the system.
	Develop user interface	Develop front-end interface as outlined in the wireframes.
	System documentation	Documentate the functionality of the system and manual of the system.
Testing	Create STD	Software Test Description (STD) documentation
	Unit testing	To evaluate each components' functionality
	Integration testing	To ensure the integration of the system between integrated system working well
	System testing	To ensure the integrated system meet the requirement from the industry
	Acceptance testing	To ensure the system satisfies the acceptance criteria for industry

Table 3: SDLC for KADA Corporation System

4.3 Duration of each deliverables

Table 4 shows the deliverables assigned by the team leader and tasks for each team member. The also provides the estimated overview of the deliverables for each task that need to be completed in the given duration.

Phase	Person In Charge	Work Breakdown Structure	Duration (week)
Planning	All team member	Meeting with the industry	1
	Nurul Ika	Divide task to each team member	1
Analysis and Design	Nuraisyah	Module: Member - Design use case diagram - Design activity diagram - Design sequence diagram	2
		Design software process model	1
		Design project schedule	1
	Nurul Ika	Module: Non-member - Design use case diagram - Design activity diagram - Design sequence diagram	2
		Analyse existing system	1
		Design UML class diagram	1
	Damiya Aina	Module: ALK - Design use case diagram - Design activity diagram - Design sequence diagram	2
		Analyse industry needs using NABC	1
		Design application layer	1
	Harini	Module: Authentication	2

		• Design use case diagram • Design activity diagram • Design sequence diagram	
		Proposed existing system	1
		Design presentation layer	1
	Nurul Ika, Nuraisyah	Module: Loan • Design use case diagram • Design activity diagram • Design sequence diagram	2
	Harini, Damiya	Module: Staff • Design use case diagram • Design activity diagram • Design sequence diagram	2
Implementation	Nuraisyah	Module: Membership Application • System construction • Develop user interface	4
	Nurul Ika	Module: Loan Application • System construction • Develop user interface	4
	Damiya Aina	Module: Membership and Loan Application Approval • System construction • Develop user interface	4
	Harini	Module: Invoice Report • System construction • Develop user interface	4
Testing	Nuraisyah	Unit testing	2
	Harini	Integration testing	2
	Nurul Ika	System testing	2

	Damiya Aina	Acceptance testing	2
	Industry	Final testing	2

Table 4: Team deliverable for KADA Corporation System

5. Project Schedule

Each planning of the activities will be conducted according to the specified duration in gantt chart. The plan was illustrated as in the Figure 25 below by using Microsoft Excel.

Figure 25: Gantt Chart
